DETAILED ACTION

1. The Information Disclosure Statement filed 04/25/05 has been fully acknowledged.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Russell (US 5,589,420).

Russell shows a structure (see Fig. 3) of a semiconductor device comprising a semiconductor die 12 having a rectangular body including an active surface and a longitudinal centerline, and a plurality of bond pads 121 disposed adjacent the longitudinal centerline, wherein the plurality of bond pads are arranged in at least one longitudinal row comprising at least two longitudinal adjacent groups of bond pads 121, each bond pad within a group of bond pads being longitudinal separated from adjacent bond pads within the group of bond pads by an interpad spacing, and each group of bond pads being separated from longitudinally adjacent groups of bond pads by an intergroup spacing. However, Russell fails to teach having the interpad spacing of less than about 0.5mm and intergroup spacing of greater than about 0.5mm as claimed.

Notwithstanding, it would have been an obvious matter of design choice bounded by well known manufacturing constraints and ascertainable by routine experimentation and optimization to choose these particular dimensions because applicant has not disclosed that, in view of the applied prior art, the dimensions are for a particular unobvious purpose, produce an unexpected result, or are otherwise critical, and it appears prima facie that the process would possess utility using another dimension. Indeed, it has been held that mere dimensional limitations are prima facie obvious absent a disclosure that the limitations are for a particular unobvious purpose, produce an unexpected result, or are otherwise critical. See, for example, *In re Rose*, 220 F.2d 459, 105 USPQ 237 (CCPA 1955); *In re Rinehart*, 531 F.2d 1048, 189 USPQ 143 (CCPA 1976); *Gardner v. TEC Systems, Inc.*, 725 F.2d 1338, 220 USPQ 777 (Fed. Cir. 1984), cert. denied, 469 U.S. 830, 225 USPQ 232 (1984); *In re Dailey*, 357 F.2d 669, 149 USPQ 47 (CCPA 1966).

Concerning claims 2-5, please see the above discussion (and see *In re Rose*).
